#### **INDUSTRIAL VACUUM CLEANERS**

#### SUCTION UNIT

Suction is generated by two carbon brush by-pass motors activated by independent switches located on a solid metal head, soundproofed with sound-absorbing material.

## **FILTERING UNIT**

The antistatic polyester stellar filter, placed inside the filter chamber, guarantees a large filtering surface area and high resistance to dust passage and clogging.

The filter can be cleaned by means of the integrated mechanical cleaning system: an external filter shaking lever shakes the filter with a vertical movement, ensuring an effective and safe cleaning action, maintaining constant suction power and preventing the dispersion of dust into the environment.

## **COLLECTION UNIT**

The steel container is equipped with a quick release system that allows for quick disposal of the vacuumed material.

#### **OPTIONALS**

- Nomex filter heat resistant up to 250°
- Hepa absolute filter /h14
- Accessory basket
- Ptfe-treated filter class m
- Hydro-oleophobic filter class m
